## 🌟 Awesome LLM Apps

A curated collection of awesome LLM apps built with RAG and AI agents. This repository features LLM apps that use models from OpenAI, Anthropic, Google, and open-source models like DeepSeek, Qwen or Llama that you can run locally on your computer.

1 GITHUB TRENDING  
#1 Repository Of The Day

## 🤔 Why Awesome LLM Apps?

- 💡 Discover practical and creative ways LLMs can be applied across different domains, from code repositories to email inboxes and more.
- 🔥 Explore apps that combine LLMs from OpenAI, Anthropic, Gemini, and open-source alternatives with RAG and AI Agents.
- 🎓 Learn from well-documented projects and contribute to the growing open-source ecosystem of LLM-powered applications.

## Getting Started

### 1. Clone the repository

```
git clone https://github.com/Shubhamsaboo/awesome-llm-apps.git
```

### 2. Navigate to the desired project directory

```
cd awesome-llm-apps/chat_with_X_tutorials/chat_with_gmail
```

### 3. Install the required dependencies

```
pip install -r requirements.txt
```

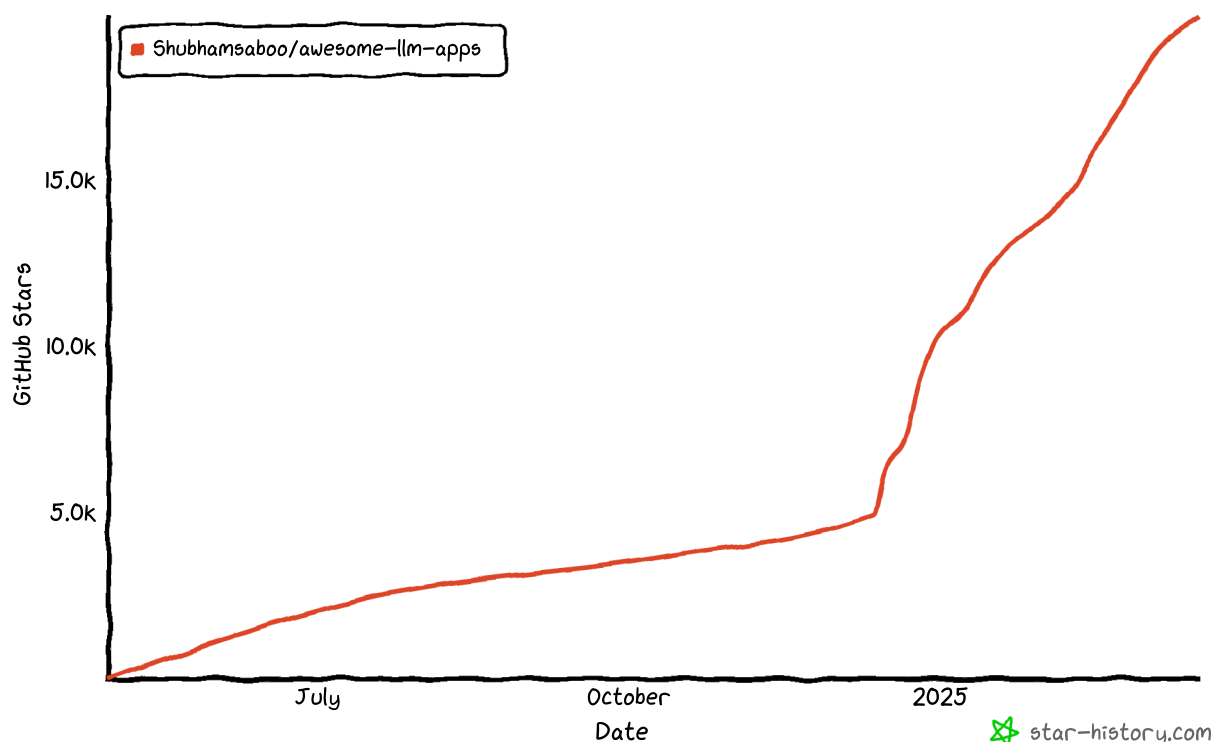

4. Follow the project-specific instructions in each project's `README.md` file to set up and run the app.

## 👉 Contributing to Open Source

Contributions are welcome! If you have any ideas, improvements, or new apps to add, please create a new [GitHub Issue](#) or submit a pull request. Make sure to follow the existing project structure and include a detailed `README.md` for each new app.

Thank You, Community, for the Support! 🙏
