210	210	Additionally, we have observed that the DeepSeek-R1 series models tend to bypass thinking pattern (i.e., outputting "`\<think\>\n\n\</think\>`") when responding to certain queries, which can adversely affect the model's performance.
211	211	**To ensure that the model engages in thorough reasoning, we recommend enforcing the model to initiate its response with "`\<think\>\n`" at the beginning of every output.**
212	212	
	213	+ ### Official Prompts
	214	+ In the official DeepSeek web/app, we don't use system prompts but design two specific prompts for file upload and web search for better user experience. In addition, the temperature in web/app is 0.6.
	215	+
	216	+ For file upload, please follow the template to create prompts, where {file_name}, {file_content} and {question} are arguments.
	217	+ ```
	218	+ file_template = \
	219	+ """[file name]: {file_name}
	220	+ [file content begin]
	221	+ {file_content}
	222	+ [file content end]
	223	+ {question}"""

```
224  +  ```
225  +
226  +  For Web Search, {search_results}, {cur_data}, and {question} are arguments.
227  +
228  +  For Chinese query, we use the prompt:
229  +  ```
230  +  search_answer_zh_template = \
231  +  '''# 以下内容是基于用户发送的消息的搜索结果：
232  +  {search_results}
233     在我给你的搜索结果中，每个结果都是[webpage X begin]...[webpage X end]格式的，X代表每篇文章
        的数字索引。请在适当的情况下在句子末尾引用上下文。请按照引用编号[citation:X]的格式在答案中对
        应部分引用上下文。如果一句话源自多个上下文，请列出所有相关的引用编号，例如[citation:3]
        [citation:5]，切记不要将引用集中在最后返回引用编号，而是在答案对应部分列出。
234  +  在回答时，请注意以下几点：
235  +  - 今天是{cur_date}。
236  +  - 并非搜索结果的所有内容都与用户的问题密切相关，你需要结合问题，对搜索结果进行甄别、筛选。
237  +  - 对于列举类的问题（如列举所有航班信息），尽量将答案控制在10个要点以内，并告诉用户可以查看搜
        索来源、获得完整信息。优先提供信息完整、最相关的列举项；如非必要，不要主动告诉用户搜索结果未提
        供的内容。
238  +  - 对于创作类的问题（如写论文），请务必在正文的段落中引用对应的参考编号，例如[citation:3]
        [citation:5]，不能只在文章末尾引用。你需要解读并概括用户的题目要求，选择合适的格式，充分利用
        搜索结果并抽取重要信息，生成符合用户要求、极具思想深度、富有创造力与专业性的答案。你的创作篇幅
        需要尽可能延长，对于每一个要点的论述要推测用户的意图，给出尽可能多角度的回答要点，且务必信息量
        大、论述详尽。
239  +  - 如果回答很长，请尽量结构化、分段落总结。如果需要分点作答，尽量控制在5个点以内，并合并相关的
        内容。
240  +  - 对于客观类的问答，如果问题的答案非常简短，可以适当补充一到两句相关信息，以丰富内容。
241  +  - 你需要根据用户要求和回答内容选择合适、美观的回答格式，确保可读性强。
242  +  - 你的回答应该综合多个相关网页来回答，不能重复引用一个网页。
243  +  - 除非用户要求，否则你回答的语言需要和用户提问的语言保持一致。
244  +
245  +  # 用户消息为：
246  +  {question}'''
247  +  ```
248  +
249  +
250  +  For English query, we use the prompt:
251  +  ```
252  +  search_answer_en_template = \
253  +  '''# The following contents are the search results related to the user's message:
254  +  {search_results}
255  +  In the search results I provide to you, each result is formatted as [webpage X
        begin]...[webpage X end], where X represents the numerical index of each article.
        Please cite the context at the end of the relevant sentence when appropriate. Use the
        citation format [citation:X] in the corresponding part of your answer. If a sentence
        is derived from multiple contexts, list all relevant citation numbers, such as
        [citation:3][citation:5]. Be sure not to cluster all citations at the end; instead,
        include them in the corresponding parts of the answer.
256  +  When responding, please keep the following points in mind:
257  +  - Today is {cur_date}.
258  +  - Not all content in the search results is closely related to the user's question.
        You need to evaluate and filter the search results based on the question.
```

```
259  +   - For listing-type questions (e.g., listing all flight information), try to limit the
           answer to 10 key points and inform the user that they can refer to the search sources
           for complete information. Prioritize providing the most complete and relevant items
           in the list. Avoid mentioning content not provided in the search results unless
           necessary.
260  +   - For creative tasks (e.g., writing an essay), ensure that references are cited
           within the body of the text, such as [citation:3][citation:5], rather than only at
           the end of the text. You need to interpret and summarize the user's requirements,
           choose an appropriate format, fully utilize the search results, extract key
           information, and generate an answer that is insightful, creative, and professional.
           Extend the length of your response as much as possible, addressing each point in
           detail and from multiple perspectives, ensuring the content is rich and thorough.
261  +   - If the response is lengthy, structure it well and summarize it in paragraphs. If a
           point-by-point format is needed, try to limit it to 5 points and merge related
           content.
262  +   - For objective Q&A, if the answer is very brief, you may add one or two related
           sentences to enrich the content.
263  +   - Choose an appropriate and visually appealing format for your response based on the
           user's requirements and the content of the answer, ensuring strong readability.
264  +   - Your answer should synthesize information from multiple relevant webpages and avoid
           repeatedly citing the same webpage.
265  +   - Unless the user requests otherwise, your response should be in the same language as
           the user's question.
266  +
267  +   # The user's message is:
268  +   {question}'''
269  +   ```
270  +
```
